

PHOTOGRAPHY CLUB

Photography is an austere and blazing poetry of the real. We may have different reasons for taking photographs, but the common theme is the desire to create a moment and capture it on a different canvass. The photography club is the place for young passionate photographers.

The club aims to create an opportunities for planning photography adventures or discussing the art form with like-minded friends. The club provides an opportunity to learn new things concerning photography and to provide a supportive environment for interested students to share their creativity; knowledge and passion for photography while attending all intra and inter college events.

The only requirement is that you just love photography! This is the club to join if you are interested in capturing memories, from the hobbyist and to even those who want to highlight their social game!

“Photographs open doors into the past, but they also allow a look into the future.”
